## WHO WE ARE

We are a not-for-profit service helping people in Greater Manchester to retrofit their properties.

Whether you're a tradesperson, small building firm or established contractor, if you're interested in retrofitting in Greater Manchester, we want to hear from you.

*"It's been a life changer. I didn't know whether I should stay in this trade, but they widened my horizons, gave me access to information and to people connected with floor insulation."*

Boris Afinogenov, Retrofit Floors

# JOIN THE GREEN REVOLUTION

Householder demand for energy efficient home improvements is growing. More people are retrofitting their homes to reduce bills, cut carbon and create cosy spaces.

But there aren't enough builders, installers and tradespeople with the specialist skills to meet demand.

## WE ARE LOOKING FOR:

- **Builders**
- **Trades:** joiners, plasterers, plumbers, electricians, roofers, window fitters
- **Specialist installers:** airtightness, insulation, heat pump, ventilation

People Powered Retrofit helps contractors tap into this demand and find customers, train staff and get technical advice.

At the end of 2020, we had:

**55**  
active enquiries

**32**  
active projects

**£20-40K**  
A typical budget of work to be procured, sometimes much more.

## WIN CUSTOMERS

We have a waiting list of householders in Greater Manchester who want to improve their home.

There's no framework fees or hidden charges, we just want the best contractors for our clients.

We organise match-making events where contractors, consultants and householders discuss potential jobs.

## ACCESS TRAINING

People Powered Retrofit offers retrofit Toolbox Talks, CPD sessions and structured training courses. All competitively priced.

Costs are between £15 - £40 per course.

## GET TECHNICAL ADVICE

If you have a question, or need guidance, our Retrofit Coordinators can help.

## FIND SUB CONTRACTORS

We are growing a network of tradespeople with retrofit experience. This community shares ideas, contacts, queries and solutions.

## EDUCATE CLIENTS

Having a 'good' client makes things much easier. We support householders with budgeting, decision making and quality control, reducing complications.

***"Meeting up with other builders, you don't feel so alone...We can swap ideas, manpower and labour."***
